REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Re claims 1-18, the feature of the control system including a plurality of electrical components that receive the electrical energy and electronically adjusts the level of an output electrical energy to the object between multiple, discrete electrical energy levels without changing the electrical components, in combination with the other limitations present, are neither disclosed nor taught by the prior art of record.

Re claims 19-29, the feature of the control system including a first regulator that controls the level of an output electrical energy to the object, and a second regulator that diverts at least a portion of the electrical energy and regulates the electrical energy to the processor, in combination with the other limitations present, are neither disclosed nor taught by the prior art of record.

Claims 30-40 are allowed. The reasons for allowance are indicated in previous Office action.

Re claims 41-43, the feature of the control system that receives the electrical energy and electronically adjusts the level of an output electrical energy to the object between multiple, discrete electrical energy levels, in combination with the other limitations present, are neither disclosed nor taught by the prior art of record.

Re claims 44-48, the feature of the control system that receives the electrical energy and directs an output electrical energy to the object, the control system including a user input that allows the user to specify a required charging condition on the object, in combination with the other limitations present, are neither disclosed nor taught by the prior art of record.
